Funky Features <i>Andrew Redstone</i>	57%	33%	10%	0%	0%

Further comments:

- Break-out sessions were good as usual.
- 'Making the best of what you've got' sessions - excellent idea, please keep it in.
- Best part of this meeting is the chance to network with other users.
- Event worked well and location is quite central.
- More on Funky Features and more 'Getting the most of what you've got, SLS, RSS, etc'.
- Would like to have seen Integra product not third party staff expenses system which is integrated at NHS.
- P2P using categories and ICS.

INTEGRA

USER GROUP

- E-invoicing, would be good to have copies of the slides in the pack.
- More time should be allocated to Andrew and his funky features.
- Funky Features should be earlier on in the day, perhaps before or after lunch and could last 75 - 90 minutes.
- Having AGM & SIG on last day felt like it was just to make the conference last two days.
- Would have been useful to see the agenda before making the overnight booking.
- Budget Monitoring - would have benefitted from hearing the experiences of an organisation which was bigger and had been using the module for longer.
- Travelling on expense to Downing Street - I think he could have said what he wanted to say in a lot less time and kept the audience interested. We already have a web-based expenses system, so for me it went on a bit too long.
- Achieving Best Value from Leasing - I think this was aimed at the wrong Audience
- Bit disappointed that the breakout sessions were only on day 1 - as a result, I decided not to stay over.
- The Funky Features session was not long enough.
- Where are the consultant surgeries?
